

TABLE 5. Type of perioperative complications occurred. SSIs, surgical site infections.

Type of complication	Number of patients
Bloodstream infection	10 (56%)
SSIs	
<i>Superficial abdominal wound infection</i>	9 (50%)
<i>Deep flap infection/ dehiscence</i>	5 (28%)
<i>Organ Space SSIs (Pelvic collection)</i>	3 (17%)
<i>Superficial flap infection</i>	3 (17%)
<i>Deep abdominal wound infection</i>	3 (17%)
Return to the operation theatre	4 (22%)
Respiratory Failure	3 (17%)
Psychiatric disorders	3 (17%)
Anastomotic leak	2 (12%)
<i>Ileal conduit leak</i>	1 (6%)
<i>Small bowel anastomosis leak</i>	1 (6%)
Flap haematoma/ bleeding	2 (11%)
Pulmonary embolism	2 (11%)
Burst Abdomen	1 (6%)
Post-operative intraabdominal bleeding	1 (6%)
